## **Amherst Transportation Advisory Committee Vision Statement**

The Amherst Transportation Advisory Committee works to create and support an economically and environmentally sustainable, multi-modal transportation system for people and goods to travel safely, conveniently and efficiently throughout the town and to connect with other communities. Bicycling, walking and public transportation will be essential parts of daily life in Amherst, with enhanced networks and inter-modal interconnections. Persons of all ages, abilities and circumstances will be able to use each of these modes, for all their transportation needs. Vehicular traffic will continue to serve personal and commercial purposes, with reduced pollution and traffic congestion. Together, this integrated transportation system will support healthy and thriving people, neighborhoods, village centers, cultural life and businesses.
