

Original Option – Option 1
Polling Place Consolidation for 2020 Elections
Town of Amherst Massachusetts
07-29-20

In accordance with Section 11 of Chapter 115 of the Acts of 2020, the Amherst Town Council has determined that the public convenience and public health would be better served by changing the current eight polling places for our ten precincts to a single building within the municipality. Furthermore, the Amherst Town Council has determined to make this change permanent.

This evaluation has been made available on the Town website and at the offices of the Town Clerk not later than 3 days prior to the Town Council vote of August 3, 2020 changing the polling place.

The Town Clerk submits (see **References** for the public meeting 07-20-20), and the Town Council agrees that the public health and public convenience would be better served during the ongoing COVID-19 pandemic by consolidating voting by the ten precincts of the Town of Amherst into one location, the Amherst-Pelham Regional High School (ARHS) located at 21 Mattoon Street, and that there is no disparate adverse impact on access to the polls on the basis of race, national origin, disability, income or age, based on the following.

Current polling locations are less optimal than one for both public convenience and public health:

There are currently ten voting precincts casting votes in eight locations on Election Day, as three of the ten precincts have separate stations within one of the eight locations. Other locations not used for casting votes on Election Day have been used recently for Early Voting, including a conference room at Town Hall, and a location on the campus of the University of Massachusetts Amherst.

Of the eight locations for casting ballots on Election Day, two of the public locations (meaning four of the precincts, as one of these holds three precincts – e.g. North Fire Station and the Bangs Community Center) and two of the private locations (churches) are currently closed or have limited capacity to the public due to the global pandemic, and others are in elementary schools. Prior to the global pandemic, parents have repeatedly expressed concerns about voting in the elementary schools due to the physical location of the polling site within the elementary buildings and concern about security.

Some residents live in physical proximity to one current polling place but must travel considerably further to their assigned precinct polling place.

One of the eight current polling places has a steep uphill climb in sometimes questionable weather from a private parking lot unless the voter has a handicapped placard for one of two

handicapped spaces located at the voting site; voters with mobility impairments that do not qualify for a handicapped placard are disadvantaged by that current site.

Most of the current eight locations for casting ballots on Election Day are not well served by public transportation routes. Easy parking is a challenge at most of the current eight locations.

One retirement community offers rides to the polls to its residents, and some local organizations have also offered rides to the polls throughout the community.

Public Health and Public Convenience is improved at the new consolidated polling place:

After thorough consideration and work with a variety of Town staff, the Town Clerk is confident this one polling location will be able to provide six feet of social distancing, privacy from other voters, and be easy to clean and wipe down polling booths and all other touch points after every voter.

All voters have multiple alternatives to voting in person on Election Day: which includes in-person early voting or voting-by-mail, traditional Absentee Ballot, the fairly new option of Early Voting, and brand-new postage paid Vote by Mail. No voter actually has to appear in person on Election Day.

No matter how we locate the polling places, poll workers are frequently retired members of our community with age and health factors that will prevent some of them from working these elections during this global pandemic.

Less experienced poll workers will be well-supported by having numerous local experts on hand in one polling location. This will move voters through more quickly.

If in the unfortunate event that contact tracing becomes necessary, tracing from one location rather than multiple locations will be more accurate, especially as staff sometimes work in more than one location.

Specifically:

1. There is no disparate adverse impact on the basis of disability or age.
 - a. The Amherst-Pelham Regional High School is a centrally located, fully accessible, building that can safely house all the necessary equipment needed to properly conduct in-person voting and provide ample space for the necessary social distancing requirements during the COVID-19 pandemic. The building can accommodate persons with disabilities or any other special considerations.
 - b. Parking for those with handicapped placards is available.
 - c. Careful consideration is being given to how voters with other mobility impairments will be assisted from the parking lot into the polling place, and also accommodated with seating areas as they move through any line, a line that is not expected to be longer than that found at a grocery store during this global pandemic.
 - d. Amherst College and Hampshire College students living on those campuses have not traditionally had a polling place on campus. Their access to voting in person on Election Day is no worse with one polling place than it is currently.

- e. University of Massachusetts Amherst students living on that campus do not currently have a polling place on campus due to low turnout when it was offered compared to security and staffing concerns. While Early Voting has been offered on the University of Massachusetts Amherst campus in 2016 and 2018 with great success, this will not be feasible in 2020 due to the significant limitations as to who has access to campus during the global pandemic, as well as the ongoing challenge of a secure location to leave equipment overnight. Students who cannot leave campus due to global pandemic restrictions in general, or quarantine or isolation in particular, may avail themselves of Absentee or Vote by Mail. Significant outreach by the Town Clerk in partnership with the University will result in students being fully aware of their options and the associated deadlines. Unusually, UMass classes begin August 24 due to the global pandemic, and therefore students living in the dorms and throughout Town are expected to arrive in the community prior to the August 22 voter registration deadline for the September 1, 2020 primary, so we do expect higher than normal turnout for that primary.
2. There is no disparate adverse impact on the basis of race or national origin.
 - a. The Amherst-Pelham Regional High School is a public school building that educates students of many races and national origins. Amherst is a diverse community and this is reflected in the standards and practices of our Regional and Elementary School Systems as well as our Elections. No voter should feel unwelcome or uncomfortable entering and voting within the High School
 - b. Voters who speak languages other than English will be accommodated at the single polling place just as they have been at the eight polling places.
 3. There is no disparate adverse impact on the basis of income.
 - a. The major economic factor is transportation. The Amherst-Pelham Regional High School is within 2.5 miles of all eight existing polling locations. This distance should not adversely impact the majority of voters.
 - b. There are 2 major PVTA bus stops within 1/4 and 1/3 of a mile of the high school. Those bus stops serve every PVTA route in Amherst, including UMass circulator routes, and routes serving Amherst's large apartment complexes.
 - c. The Town Clerk will be offering shuttles from the various locations to the High School. This will be open to all voters who may need transportation.
 - d. If transportation issues are irresolvable for certain voters there will be early voting widely available at the centrally located Bangs Community Center, which is also on major bus routes, prior to each election and mail in early voting with all postage costs prepaid will be available to all voters.
 - e. Substantial outreach is being developed by the Town Clerk in partnership with various agencies to ensure all voters are aware of their voting options well prior to actual in-person voting on Election Day. This includes extensive use of the popular Town website including News & Announcements on the front page, Twitter, Facebook, email notifications to subscribers, use of the subscriber emergency

notification phone system (sometimes referred to as reverse 911 call), notices in Senior Center publications, notices to parents via school publications, notices in community rooms of apartment complexes, notices through college and university email lists, etc.

Based on the information above and the information provided by Town Clerk, the Town Council reports that the consolidation of polling places in accordance with Section 11 of Chapter 115 of the Acts of 2020 will have no disparate adverse impact on the basis of race, national origin, disability, income, or age.

DRAFT MOTION FOR TOWN COUNCIL 08-03-20: VOTED (roll call Zoom) 08-03-20 to locate in-person voting on September 1, 2020 and November 3, 2020 and for all elections going forward for all ten precincts at Amherst-Pelham Regional High School, 21 Mattoon Street, as this will have no disparate adverse impact on access to the polls on the basis of race, national origin, disability, income or age.

On behalf of the Amherst Town Council, August 3, 2020

Lynn Griesemer, President
Amherst Town Council

AN ACT RELATIVE TO VOTING OPTIONS IN RESPONSE TO COVID-19

SECTION 11. Notwithstanding section 24 of chapter 54 of the General Laws or any other general or special law to the contrary, the select board, board of selectmen, town council or city council may, by recorded and public vote, change any polling place to be used at the primary election or the general election at least 20 days prior to the date of the primary election or general election if it is determined that the public convenience or public health would be better served. If the select board, board of selectmen or town council determines that the public convenience or public health would be better served, they may house all polling places in a single building within the municipality, if such building is suitably equipped; provided, however, that alcoholic beverages shall not be served or consumed in that portion of a building used as a polling place, during voting hours or while ballots are being counted therein. In cities, the city council may designate polling places in non-adjacent precincts if they determine the public convenience or public health would be better served. In making a decision to change a polling place, the select board, board of selectmen, town council or city council shall evaluate and report on whether such change would have a disparate adverse impact on access to the polls on the basis of race, national origin, disability, income or age, and not later than 3 days prior to changing a polling place, shall make publicly available on its website and at the office of the town or city clerk a report on its evaluation. When the polling places have been designated pursuant to this section, the board of registrars shall post on the municipal website and at other such places as it may determine, a description of the polling places and shall notify voters by using an electronic means, to the extent available, such as via email or reverse 911 call.

Vote by Mail Applications

Official 2020 Vote by Mail Application

Voting by mail is available to all registered Massachusetts voters for all elections in 2020. You do not need an excuse to vote by mail this year. In-person voting will still be available.

To vote by mail, all you need to do is:

1. **Complete** a [Vote by Mail Application](#); or use the pre-addressed paper application card that you may have received in the mail.
2. **Deliver** your application to Amherst Town Clerk, 4 Boltwood Avenue, Amherst, MA 01002 or drop in the drop box on the Main St. side of Town Hall. Or return the pre-addressed paper application card that you may have received in the mail.
3. **Vote** when your ballot arrives;
4. **Return** your ballot.

Applications must reach The Amherst Town Clerk's office by **August 26** for the State Primary. Applications must reach the Amherst Town Clerk's Office by **October 28** for the State Election.

Apply early, in order to have enough time to return your ballot.

For more information on voting by mail, see the Secretary of Commonwealth's page on [Voting by Mail FAQs](#).

To contact the Amherst Town Clerk, email vote@amherstma.gov or call 413-259-3050 or visit www.amherstma.gov/vote
